

NECROMANCER DICE TOWER — RAMP ASSEMBLY GUIDE

Print at 100% on 200–300 gsm cardstock. Use a bone folder or butter knife to score ALL fold lines before folding.

A — HOW TO FOLD A RAMP (applies to RAMP A, B and C)

1. CUT OUT FLAT

All fold lines printed.
ORANGE = notch to cut.

2. SCORE + CUT NOTCHES

Score BLUE + RED lines.
Cut & remove ORANGE triangles.

3. FOLD STEPS

Result: stepped profile
side walls stand vertical.

B — WHY THE ORANGE NOTCH CUTS

At each step fold, the side-wall strip must bend 90°. Without removing the orange triangle, excess paper bunches at the inner corner and prevents the fold from lying flat.

WITHOUT notch (wrong):

← paper bunches here

WITH notch (correct):

← clean corner

C — OVERALL ASSEMBLY ORDER

1. Print all sheets at 100% — do NOT scale to fit.
2. SCORE all blue dashed (valley) and red dotted (mountain) fold lines BEFORE cutting.
3. CUT all solid black lines. Remove orange notch triangles on each ramp.
4. BASE TRAY (Sheet 05): fold F1–F4 valley, F5 mountain, glue corner tabs.
5. BODY A (Sheet 01): fold panels — front + left side.
6. BODY B (Sheet 02): fold panels — back + right side. Glue A+B together.
7. Pre-fold RAMP C (lowest), dry-fit, glue onto anchor marks C-L / C-R.
8. Pre-fold RAMP B, dry-fit on B-L / B-R. Verify HIGH/LOW orientation.
9. Pre-fold RAMP A, dry-fit on A-L / A-R. Verify flow direction.
10. Glue one side-tab first; verify ramp lays flat; then glue opposite tab.
11. Attach base tray. Drop test with d6 to verify free passage.

D — MATERIALS & TOOLS

- Cardstock: 200–250 gsm recommended (300 gsm possible) Glue: PVA or glue stick. Thin bead; hold 30 s.
- Score with bone folder, blunt scissors back, or empty ballpoint. Do NOT use hot glue — sets before alignment.
- Cut with craft knife + metal ruler on cutting mat. • Scissors only for gentle curves, not fold lines.
