

NECROMANCER DICE TOWER — RAMP ASSEMBLY GUIDE

Print at 100% on 200–300 gsm cardstock. Use a bone folder or butter knife to score ALL fold lines before folding.

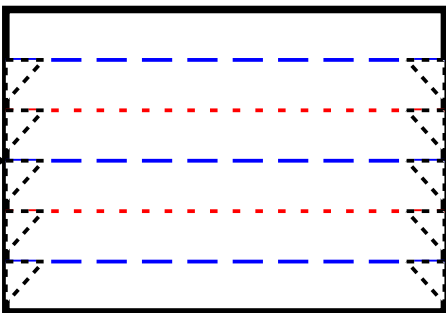

A — HOW TO FOLD A RAMP (applies to RAMP A, B and C)

1. CUT OUT FLAT

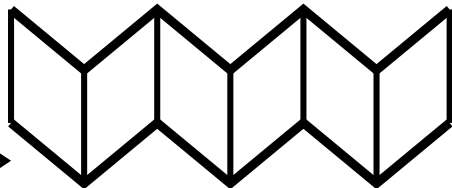

All fold lines printed.
ORANGE = notch to cut.

2. SCORE + CUT NOTCHES

Score BLUE + RED lines.
 Cut & remove ORANGE triangles.

3. FOLD STEPS

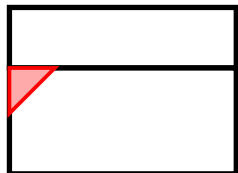

Result: stepped profile
 side walls stand vertical.

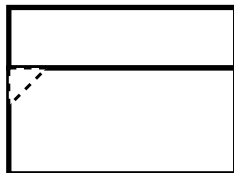

B — WHY THE ORANGE NOTCH CUTS

At each step fold, the side-wall strip must bend 90°. Without removing the orange triangle, excess paper bunches at the inner corner and prevents the fold from lying flat.

WITHOUT notch (wrong):

WITH notch (correct):

C — OVERALL ASSEMBLY ORDER

- Print all sheets at 100% — do NOT scale to fit.
- SCORE all blue dashed (valley) and red dotted (mountain) fold lines **BEFORE** cutting.
- CUT all solid black lines. Remove orange notch triangles or **SEARCHING** for bone folder, blunt scissors back, and sharp pointed tabs.
- Assemble BASE TRAY (Sheet 05): fold F1–F4 valley, F5 mountain, glue pointed tabs.
- Assemble BODY A (Sheet 01): fold panels to form front + left side. Glue A+B together only.
- Assemble BODY B (Sheet 02): fold panels to form back + right side. Glue A+B together only.
- Pre-fold RAMP C first (lowest ramp), dry-fit, then glue onto Base Tray (white label). **Glue** or glue stick.
- Pre-fold RAMP B, dry-fit on B-L / B-R anchors. Verify flow direction and hold 30 s with finger.
- Pre-fold RAMP A, dry-fit on A-L / A-R anchors. Verify flow direction. **Do NOT** use hot glue — sets before alignment.
- Glue one side-tab first; verify ramp lays flat; then glue the opposite tab.
- Attach base tray. Drop test with d6 from the top to verify free passage.

D — MATERIALS & TOOLS

Cardstock: 200–250 gsm recommended.

Tools: bone folder, blunt scissors back, and sharp pointed tabs.
